

Toronto

Map #13, Credit Valley Footpath

The CVFP is temporarily closed at three locations due to major construction and is currently not a through trail. Anyone hiking into the construction sites must turn back at these points.

A new subdivision is being built on the south side of 20 Sideroad (Ed. 25, Map 13, km 6.3). The Trail will remain but will end up crossing a residential street through the planned subdivision. The trail will reopen after construction is completed.

The second and third trail closures are at both CN Railway crossings (see map for detail). The railway bridge is being widened to add a second track and the trail between these two points will be inaccessible.

Construction at both sites is expected to be completed in 2011. The trail will be closed at these sites until further notice. We cannot reroute the trail around them but in the meantime, the through sections of the footpath will continue to be maintained. Hikers are requested not to trespass on the construction sites.
