

**Niagara  
Map #3**

This reroute through the Short Hills Provincial Park completes the long planned routing of the trail by the two waterfalls, Terrace Creek Falls and the Swayze Falls. The last portion of the reroute was made possible by construction of a bridge over Terrace Creek. The trail should now be accessible year round. A major portion of the old Terrace Creek Side Trail will be the main trail and northern part of the old trail will be the Terrace Creek Side Trail.

Main Trail Route = 3.1 km  
Terrace Creek Side Trail = 2 km
